

Biotechnology Web Quest

Task:

You are about to be in high school, trying to prepare for life after graduation. You have signed up for the Biotech program hoping you are on the right path! You need to investigate and research what biotechnology involves and some career choices that interest you in biotechnology.

On your search, you need to consider the following questions:

- What is biotechnology?
- What biotechnology career am I interested in?
- Is there a job available? What is the salary?

Process:

1. Research and define biotechnology.
2. Research an occupation of your choice in the biotechnology field. Research using the web sites given below. Give a description of the job you will be performing. Make sure to find out salary, job duties, and education required for your chosen occupation.
3. Find a job. Search the internet to find at least 2 Help Wanted Ads for your chosen occupation. Summarize the jobs and explain what the job requires (skills and education).
4. Make sure everything is written in your own words. DO NOT COPYRIGHT!
